

## SPECIFICATION REPERIO.FR

### PC website and Mobile Website

Our website aims to develop an online management platform for lost & found objects with the use of stickers. This solution allows users to buy stickers which will be affixed on the owners' objects (glasses, laptops, phones ...). Users shall register the code on the website or the mobile application (flashing QR code). Platform will alert by email users if its object is found.

The person who finds an object with a sticker will be encouraged to declare the code on the web/mobile site. Once the object is found, it is identified by the system and the platform notifies the owner via email and give access to contact details of the person who found the object.

The website should allow users to:

- Create an account
- Buy lots of stickers
- Associate stickers to their objects
- Report the loss of an object by email
- Access full contact information of the finder after he paid the service
- Declare a found object
- The payment process management via Paypal platform

### Specifications:

The design must follow basic web design rules:

- Consistent site header/logo (logo enclosed)
- Page footer area includes copyright, last update, contact e-mail address
- Color scheme is limited to a maximum of three or four colors plus neutrals
- Color is used consistently
- Common fonts such as Arial or Times New Roman are used
- No more than one web font is used
- Fonts, font sizes, and font colors are consistently used
- Information is easy to find (minimal clicks)
- Find a suitable place to put the sponsor's logos.

For mobile version, we need a design that can fit to any screen size, so please create standard mobile design.
