

COMPLAINT MANAGEMENT

Complaints from our customers form one of the important ways we learn about the experiences they have while dealing with us. It is essential that we use this information for investigating the concerns raised in the complaint to continuously improve our services and where possible prevent the reoccurrence by eliminating the root cause of it.

With a philosophy that embraces customer satisfaction as a primary goal of our business, NASCO is pleased to announce the official launch of Complaint Management System. NASCO is committed to be fair, responsive, and accessible and provide quality service and work continually to improve it.

All our customers are encouraged to get in touch with us if they have encountered a problem or have any concern.
