

Triton products are the perfect choice for financial institutions looking to stay dry without breaking the bank.

COST-SAVINGS

- Avoid tear-offs and utilize your existing roofs to your advantage with the seamless TRITOflex rubber membrane
- Install the last roof you will ever need
- Reduce maintenance costs by eliminating the two biggest causes of leaks and repairs: punctures and seams

PERFORMANCE

- Eco-friendly “green” products with no VOC’s
- Non-disruptive, no odor, re-roof while still conducting business
- Warranty covers baseball-sized hail and ponding water
- Reduce heat transfer through the roof by **40%**, reducing energy costs

CASE STUDY

The 20-year-old rusted metal roof system over this high-volume bank began to leak heavily where metal panels had moved and left areas for water to enter the building. Without disruption, a TRITOflex fluid-applied rubber roofing system was installed, restoring the roof’s watertight condition and **saving the company 60%**.
