TECHNICAL EXPERTISE FOR SPECIALTY INSURANCE MARKETS

Spectrum Adjusting is a firm of highly skilled claims management and loss adjustment professionals. We specialize in managing and settling large complex losses for a diverse range of industry including energy, mining, natural resource, chemical, and legal liability sectors. Our established real-world experience working with industrial, commercial, liability, business interruption, property, and complex technical large loss adjusting puts us ahead of the pack.

Our Approach

Our unique adjusting approach is rooted in engineering enabling us to successfully manage large industrial losses.

Experience

Proven hands-on experience, a track-record of success, and individualized claims services set us apart. Our professionals have long track records of large technical adjustments with exposures up to half a billion dollars

The Difference

Spectrums claims adjusters consist of dedicated professionals in the areas of law, engineering and expert industrial claims management who understand the needs and challenges of complex losses.

Niche Expertise – Our claims professionals have real world experience working major industrial losses with fortune 1000 companies.

Loss Control – If you are unable to speak the language, you cannot possibly understand the needs of complex industrial clients. Our professionals are fluent in the language of industrial operations and understand major losses. We seek to work collaboratively with insured's to find intelligent sensible solutions for loss control and mitigation.

Customer Service Tailored to Your Needs – We work with the entire spectrum of commercial underwriters, brokers, captive markets, re-insurers, self insured's and custom tailor to your claims consultant needs.

Extensive Experience – Our claims professionals have actual experience backed by a large volume of successful loss adjustments in the industrial, commercial and legal sectors. We are experienced in both domestic and foreign claims handling.

Whether complex industrial property or liability, we offer a higher caliber of specialty claims management expertise in the following service sectors:

Energy

Chemical Operations

Forest Industry

Mining

Commercial Claims

Litigation Support Services

We are dedicated to quality, and to providing our clients with a personal case-by-case approach to claims handling. Spectrum Adjusting offers the resources and capabilities of a larger company, and the accessibility and personal touch of a smaller firm, giving our clients “the best of both worlds”.

Executive Team

An unparalleled group of tactical-driven claims consultants with the experience to exceed the requirements of all parties.

Shayne Schwede has been actively managing and adjusting large complex losses in the specialty insurance markets for over 24 years. He is a Fellow Chartered Insurance Professional (FCIP) accredited by the Insurance Institute of Canada and received his risk management designation (CRM) through Simon Fraser University and the Global Risk Institute.
