

Hello,

I need a logo build for a painting company.

the company name is "Salgado Painting".

We are a painting company that does commercial and residential work. So I would like the logo to say "Salgado Painting" then in smaller letters "Commercial & Residential". Or maybe one version can say just the name of the company, and another for it to say "Commercial & Residential"?

Please feel free to use your own judgement on colors. Also feel free to use your own judgement on icons or graphics used as well as fonts.

We want something modern and colorful. Our work vans are all white. And in the future we want to put the logo nice and big on the side of the vans. So a logo that would look great on a white background would be preferred.

I would need the logo in AI format. As well as a Jpeg and a PNG with a transparent background so that I can use that on a website.

Thanks so much!

Let me know if you have any questions please.

Raul
