

## Front of Flyer Content

### 30-Day FREE Trial & NO Long Term Commitment!

- **FREE Backup Server**
  - Carroll-Net provides each customer with their own Healthy Server. Daily customer backups are sent to their Healthy Server then transmitted to our Datacenter. If a customer needs to restore a file or even recover an entire server, all the data is immediately available on their Healthy Server. And if a customer is prohibited from accessing their office, they have access to all their data stored at our Datacenter.
- **How it Works – The Three Way Backup**
  - Everyday, you'll get our trademarked "Three Way Backup"; Backup Onsite, Backup Offsite and Backup to Archive. And Carroll-Net will make sure it works simply & reliably.
- **Fully Managed Backups**
  - Carroll-Net engineers will fully manage your backups and ensure they work correctly. And our predictive monitoring means issues are corrected before they become problems.
- **CncOp™ Block Level Backups**
  - Healthy Servers are built on Carroll-Net's patented CncOp™ Technology. It's a differencing engine that can perform an offsite backup sending only block level changes. This makes it possible to perform a FULL backup each night over the Internet to a Carroll-Net Datacenter.
- **LoJack® Theft Recovery**
  - To protect the server from theft each Healthy Server is equipped with LoJack® Theft Recovery.
- **Daily Virus Checkup**
  - Each day the Healthy Scans backups for viruses. If detected, customers receive an email notification with the details. And it alerts Carroll-Net engineers to assist customers with the cleanup.
- **20+ Years Experience**
  - We've been providing Data protection solutions to businesses for over 20 years. We have the maturity and experience to recognize the quality and performance you expect in a partner, and to deliver.
