We are looking for a new site design for the Friends of the Canadian War Museum. The current site can be found at

http://www.friends-amis.org/fcwmindex_e.html

The URL is provided for reference. We want a completely different look and layout which is shown in the specifications document. Visiting the site, you can learn more about the organization.

Initially, we would like a home page, and inside page provided. Once we a home page and inside page are selected, we would like a simple mobile template provided.

The design you provide will be implemented in Joomla. The design winner will only need to provide the PSD. We will code the template in-house.

However, if you have experience creating Joomla templates, please let us know as we may ask you to bid separately to do that phase of the project.

We've provided a specifications document which includes wireframes of the home page, and inside page. We've also uploaded a zip e containing images to be used as part of the design.

The wireframe is provided to illustrate the placement of content and menu items. The exact dimensions of each component can be revised as you see fit. Also, while we uses boxes to illustrate the area, we do not necessarily want a "box" around the area. We leave this up to you. We are also flexiable if you feel we have missed items.

For the header at the top, as indicated in the specs document, we want to keep the same overall treatment to every page. We want the logo below the top menu. The FCWM logo is based on the design of the Canadian War Musuem building and is the same shape. The museum is a very unique structure. The FCWM logo, while it is based on the museum building, is often mistaken for a plane. To help cement the relationship between the logo and the building, we would like the building included in the top banner (with a nice graphic treatment). Within the zip file, we have included a number of photos of the building within photos-musuem.

Below the logo, we want to include a photo that will change when the user visits different sections. For this area, select and use one of the photos provided in the photo-top-area contained in the zip file.

On the home page, below the main navigation, we wish to include a tab content area. Please use the text and photo from BROCH_oct 28.pdf for the Be a Friend section.

On the right side of the home page, there is a call out for Photo Gallery and Member Treasures. We would like an image included in each. For photo gallery, select one of the photos in the folder photogallery and use member-treasure.png for Member Treasures.

In the bottom right, we want to include the logo for the Torch and Canadian War Museum. These logos as well as the logo for the CFWM can be found in the logos folder.
