

Merchants, Businesses, I have a business, Online Payment Processing, SaaS

This interactive graphic box will convey to the website visitor that this is where you click if you are a business and need to get setup to accept payments for your business with us.

Something along the lines of maybe some skyscrapers, maybe a business district

[Businesses Click Here]

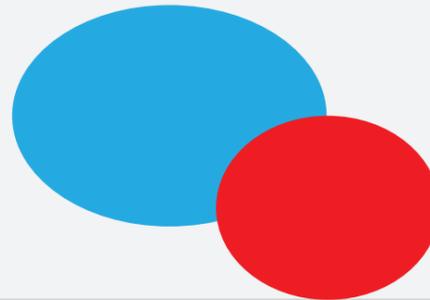

Developers, I Develop Software, Software Application Developers, Payment Processing API

Software Developers, Start-ups. Users who are looking to integrate a payment platform into their; website, ERP, CMS, mobile solution, software offering, some type of advanced integration requiring a custom integration with a payment processing platform, PaaS.

Something graphically that speaks to software engineers and developers. Initial thoughts were maybe some gears moving with source code or programming languages incorporated.
