

## Back Panel

## Front Panel

### Notes:

1. If art can not be pulled back from end of bleed, an additional layout is available that requires trim between panels at additional cost
2. The standard size of the barcode is a width of 37.29mm x height of 26.6mm
3. The bar code can be scaled from 80% to 120%.
4. The minimum height of the bars is 9mm
5. The boundary box of the barcode must be at least 12 mm from the left or right edge, and the outside bars of the barcode must be 3mm from either side of the box
6. Lane number should be enclosed in characters determined by CPNA. Please contact CPNA for specific information
