COLOR COATED STEP CONE DRILL BIT

1/2

7/16

3/8

5/16

1/4

3/16

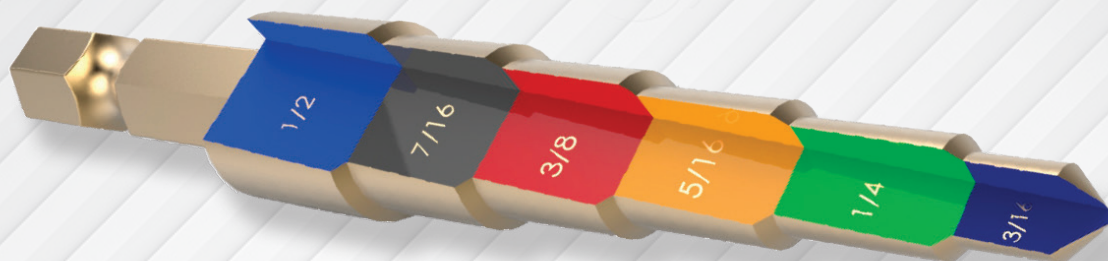

BENEFITS

Saves Time — No need to stop and check position

Reduces Errors — Quick visual reference of diameter during use

Simple to Use — Operators easily understand how to use the product

THE TECHNOLOGY

Kaber Technologies has developed a color coded stepped cone drill bit for quick and easy diameter reference during use.

When a user is using a stepped cone drill bit it is common to stop part way through the drilling process to check the correct diameter ring before finishing, this technology allows them to check this in use. The colors used and the method and design of application can be varied for specific product needs.

The main objective of this product is to create a quick and easy way for users to see visually what diameter they are drilling to.

LICENSING OPPORTUNITY

Kaber Technologies is looking for an exclusive licensing partner for this innovative new step cone drill bit. A provisional patent has been filed with the USPTO and is available for immediate licensing. Along with product licensing Kaber Technologies has the ability to support this product or other product developments in the following capacities.

- Design
- Patenting
- Marketing
- Manufacturing
- Program Management

Sample available upon request.
