IHTO is a mobile audiometry service catering for industries requiring annual hearing monitoring. We operate from an air-conditioned sound treated truck fitted with an audiometric booth. IHTO has state of the art equipment which ensures that IHTO meets the required standard AS/NZS 1269.4.2005. JIT just-in-time scheduling ensures prompt turn around and return to work for workers. Employees receive an instant report on their results which educates and motivates on Hearing Conservation. Health and Safety Managers receive spreadsheet analysis for annual monitoring compliance with the Department of Labour Code of Practice and for ACC partnership programme. IHTO also provides worker education training, hearing protection fitting and sound surveys for hazard identification and monitoring of noise. IHTO provides the same high quality service to small and large companies. IHTO is cost effective. Group discounts available.
