

Make the “i” look like a magic wand with
a “beacon” radiating outwards from it.

HiBeek

One possibility is to make the radiating signal look like a star like this.

The other possibility is to make the radiating signal look like Apple's iBeacon. If you choose to use this motif, please use only 3 radiating circles instead of Apple's 6.

Be sure the magic wand looks like a magic wand, and not an “antenna” for a radio

Magic wand could look like this

Or like this
