

The company name is Green and Gold Vapor.

The logo is going to be gold foil on a clear sticker on front of a small one ounce green bottle like nYc foil image to the left.

We would like the use of G&G (not necessary to include the & sign) to be like a universal brand symbol GG in a geometric arrangement like back to back facing away from each other, or one G on top of the other G.

We like the bold inner lined example of the G on the GQ mag image.

We are looking for a clean yet sophisticated design.

Please feel free to contact me with any questions

After this logo is finished we will need to incorporate it into a label design and for business cards and fliers

We will need vectored illustrator files of the finished logo.

THANK YOU
