- Accrual tracking (vacation, sick or personal time)
- Garnishments and electronic filing with state jurisdictions
- Workers compensation tracking & billing
- Print Paychecks and direct deposit remittance on site
- "No Penalty" guarantee with Full Payroll service

Payroll FAQ

Why is Evosus payroll less expensive than doing it myself?

Time is money. The amount of time required to process payroll in house versus using an online payroll system or payroll service bureau has been proven to be significantly more. State and federal tax compliance systems are laborious and strict. One error or missed deadline can generate enough penalties to cover a payroll service for months. Payroll is often one of the highest expenses next to inventory. We believe accuracy and the time savings benefits gained by a service based payroll system far exceed the cost of paying for it.

Why am I charged per check?

We considered multiple pricing arrangements, including a la carte for each service (i.e. processing, direct deposit, reporting, electronic processing, tax compliance etc.). We found that our existing pricing model is more competitive to comparable services and ensures our customers only pay based on usage of the system with no other hidden fees.

I'm on Paychex. Is Evosus Payroll like a service bureau?

Evosus Payroll offers both do-it-yourself payroll and full service payroll. The latter is more like a payroll service provider, however, there is no more waiting for checks to arrive by courier or having to pay a courier fee. You print the checks and remittance advices right at your own printer. And unlike a service bureau, we don't charge you extra for our premium services such as direct deposit or a 401(k) report. You get one charge per payroll.

Is it safe to process payroll using an internet based system?

Whether we like it or not, every major player in the payroll business is moving to the internet. Why? Updated state

and federal compliance in real time and substantial feature benefits thanks to advances in the technology. All data is safely stored on a backed up server protected with encrypted firewalls. Access is only gained by password and specific rights issued to a user.

Is it installed on my server?

No. Evosus Payroll Relief is hosted on a remote secure file server that can be accessed from any browser by secure login. You can take your payroll system with you. Many owners and payroll processors have mentioned this as one of their favorite features of the system.

Should I wait until year end to start payroll?

Our staff is ready to perform your entire setup for a small setup fee. We can initiate payroll at anytime throughout the year.

Will I get training with the payroll system?

Yes. Everyone who uses Evosus Payroll will receive online training.

Can I continue to use QuickBooks for my payroll?

Yes. You can continue to process payroll in QuickBooks and transfer your payroll totals into Evosus by journal entry. Consider however that despite the initial lower cost, there are other costs Intuit will subject you to; you will be required to maintain a tax table at an annual charge, you'll incur per-item or a la carte charges for add-ons to your payroll setup (EFTPS setup, direct deposit, etc.) and you'll need to update your QuickBooks software periodically to be supported by the latest payroll system. You also may not be able to process your state through QuickBooks as there are several states it does not support. All that said, we believe your biggest reason to use Evosus Payroll is because you'll receive direct support from our office at no additional charge.
