

## Urban Planning for All

At Urbanflow Engine, we believe that everyone is an urban designer. We bring state of the art geospatial technology to enable collaborative urban planning. We conduct planning workshops where experts and non-experts collaborate to produce designs to help you with your planning problems.

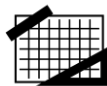

### Crowd-sourced Urban Planning

We offer day long workshops and with all material is provided by us.

#### Form Teams

Gather maximum 15 people from the community and form four small teams.

#### Create Designs

Agree on the requirements and create design ideas. Designs can be hand drawn or digital.

#### Compare and Synthesize

Once the designs are complete, compare, analyze and synthesize the designs. Repeat the design creation and refine.

### Accelerate your understanding

The outcome of the workshop are designs and design ideas built collaboratively that take into account diverse views and advanced analysis of your planning problem. They are available for you to analyze and our team is here to support you before, during and after the workshop.

### Science and Design combined

**Collaborative Design:** All the designs that are created are readily accessible online in Urbanflow Engine for review and sharing.

**Compare Designs and Impacts:** The super simple interface enables advanced comparisons and synthesis of designs and their impacts.

**Any Scale:** Use these workshops to address problems from a block level to a regional level.

The workshops are conducted by Hrishikesh Ballal is a PhD student at the Center of Advanced Spatial Analysis at the University College London. Email him at [hrishi@urbanflowengine.com](mailto:hrishi@urbanflowengine.com) to organize one.
