

Sultrískin

Company Name: Sultriskin

Sultry + skin = Sultriskin

Website (have not created yet, only registered): www.sultriskin.com

Would like some kind of an emphasis on the "i" because when people type in the url www.sultriskin.com, we to make sure they remember it's spelled with an "i" in the "Sultri" (verse w/ the letter "y") part of the name Sultriskin. My thoughts would be that the letter "i" in Sultri can be emphasized by changing the color of the that letter or with an accent on the "í" (see sample of the company name above on the first line) but whatever you think is best as I'm open.
