Cleaning products (NO biocides/disinfectants!)

Green detergents + probiotics

Clean, green sustainable hygiene!

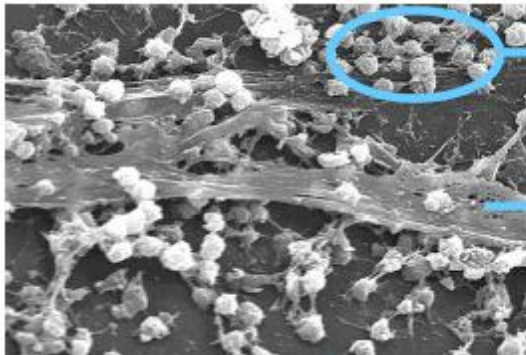

Probiotics in Progress

Revolution in cleaning

- 1. Microscopic deep cleaning**
- 2. Prevention and elimination of odours**
- 3. Healthy microflora in the home and work environment**

***Turn your work and living environment
into a clean and healthy place!***

Biofilm

Micro-organisms

(bacteria, fungi, archeae, algae...)

Biofilm binding matrix

(exopolysaccharides, proteins...)

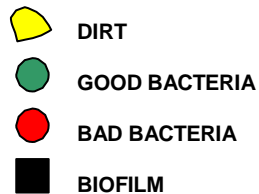

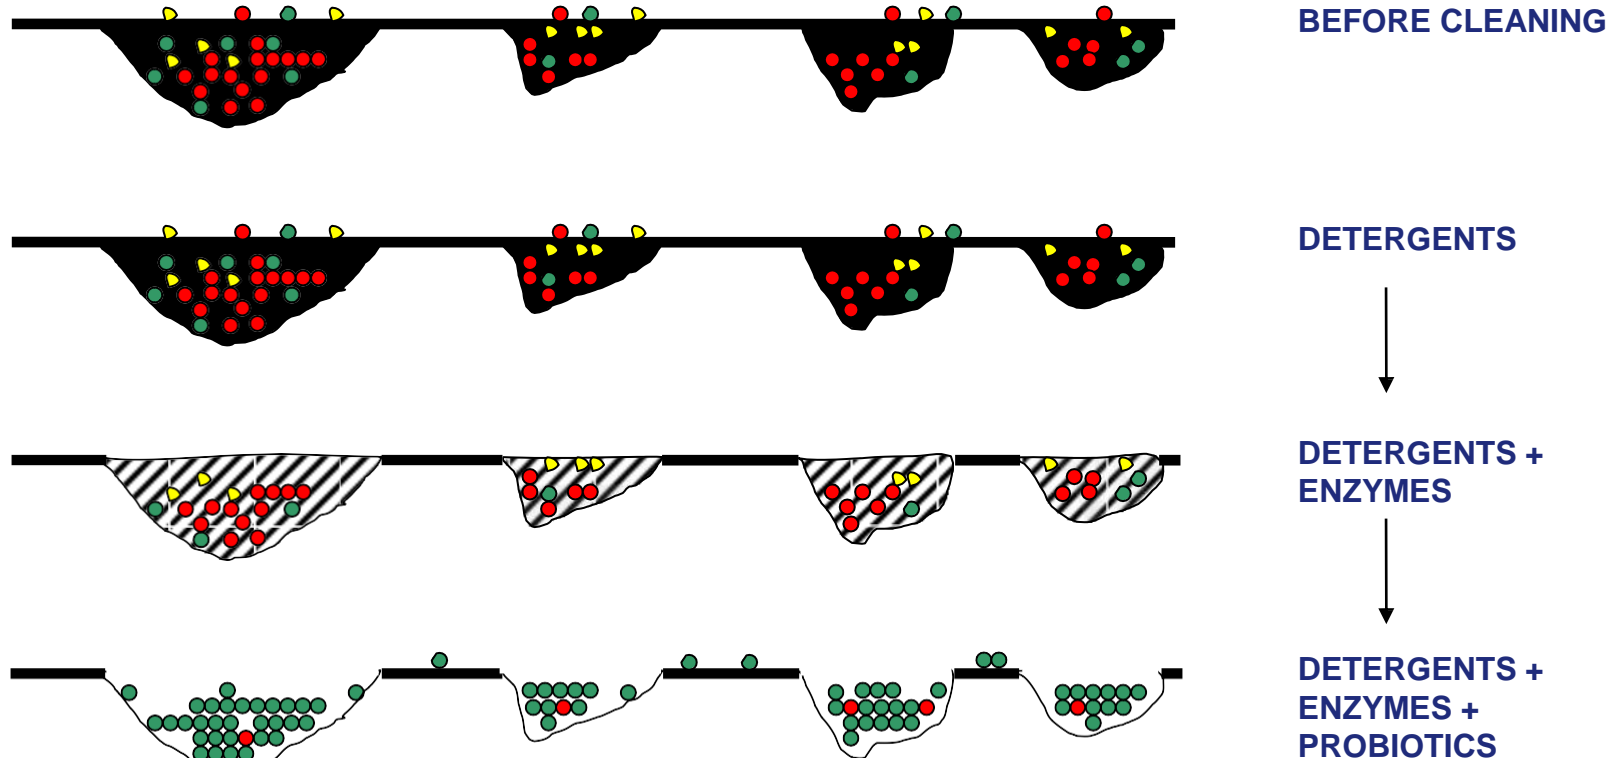

**Universal presence on surfaces,
in machines, on our body...**

Very tenacious

Shelter for bad germs

Source of bad smells, odours

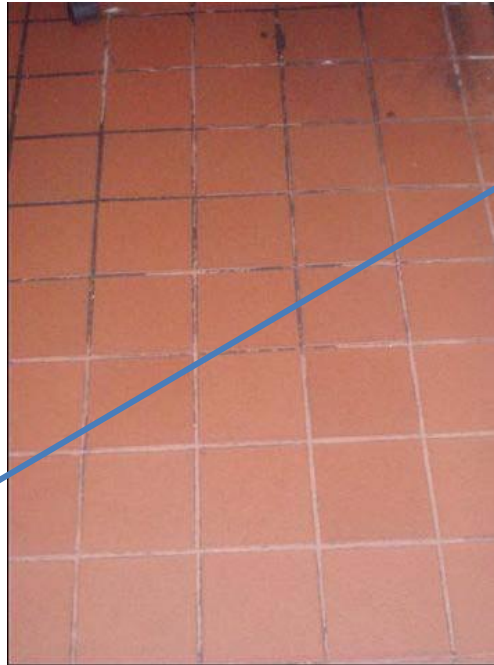

PROBAC Action

The green detergents, enzymes and probiotics in the Probac products actively remove biofilm eliminating both food sources and shelter for bad germs. This results in a healthy and stable microbial environment.

Microscopic deep cleaning

Chemical cleaning

Probiotic cleaning

Microscopic deep cleaning

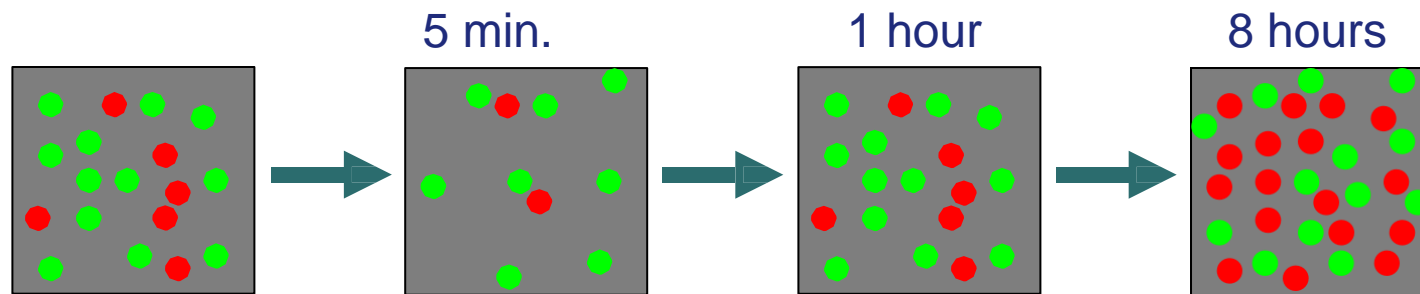

**Chemical
cleaning**

**Probiotic
cleaning**

Healthy micro-flora

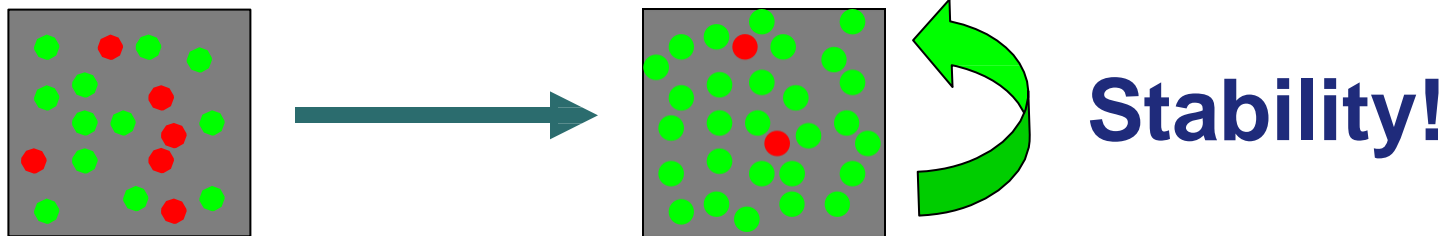

Chemical cleaning/disinfection

● Good bacteria

● Bad germs
