CeilingFlat
ULTRA FLAT TINTABLE

Product Summary

Use: Ceilings

Number of coats: One coat may be sufficient, however two coats may be required depending on individual situations such as application technique and depth of colour of original finish. Some tinted colours may require additional coats to achieve full opacity.

Application: Brush, roller or spray

Touch Dry: 20 minutes
(In temperatures of approx. 25°C)

Recoat: 2 Hours
(In temperatures of approx. 25°C)

Do not apply if temperature is likely to fall below 10°C during application or drying or if relative humidity is likely to exceed 80%.

Coverage: Up to 16 sq metres per litre.

Clean up: Water

Australis Ceiling Flat is a premium water based paint for use on ceilings. Australis Ceiling Flat's advanced formulation minimises roller spatter and overlap marks. With Australis Ceiling Flat's excellent opacity, one rolled coat will normally produce a satisfactory result on a white ceiling in average condition, but for best results two coats are recommended.

Surface Preparation

Previously Painted

- Remove loose and flaking paint.
- Wash to remove all grease, dirt and smoke deposits and rinse with clean water.
- Treat area to destroy mould and rinse with clean water.
- Repair cracks and defects with a good quality filler.
- Sand smooth and dust off.
- Glossy surfaces should be sanded to remove the gloss. Apply one coat of Australis Sealer Undercoat.
- Uneven or patchy surfaces require a coat of Australis Sealer Undercoat.

Unpainted paperfaced wallboard

- Dust down surfaces and apply two coats of Australis Ceiling Flat.

Unpainted Fibro Cement

- Wash to remove dirt and grease, allow to dry and apply two coats of Australis Ceiling Flat.
- Unpainted Bareset Plaster or Fibrous Plaster**
- Dust down surfaces, repair cracks or defects with good quality filler, sand smooth and dust off. Apply one coat of Colourtrend Binder Sealer. Apply two coats of Australis Ceiling Flat.

Application

- Stir well prior to use and occasionally during use. Apply two coats of Australis Ceiling Flat ensuring that the first coat is completely dry prior to the application of second coat.
- Thinning is not required, however in hot conditions, application will be assisted by the addition of up to 50ml of water per litre.

Safety

Keep out of reach of children. Avoid contact with skin and eyes. Avoid inhalation of vapour by providing adequate ventilation.

First Aid

Eyes: Rinse with running water for at least 15 minutes. If irritation continues seek medical advice.

Swallowed: Drink plenty of water and immediately seek medical assistance.

Inhaled: Exit area contaminated by vapours, seek medical assistance if effects continue.

Disposal

- When cleaning up after painting, ensure that paint does not get into gutters or drains as it may contaminate waterways. For a free brochure on cleaning up after painting and the disposal of surplus paint, ring 1800-807-568 (free call).
- Do not reuse empty cans. This can is recyclable. Check with your local council to see if it is participating in a steel can recycling programme.
