## interior / exterior

# PerfectPrep™

PURE ACRYLIC - PRIMER - UNDERCOAT - SEALER

**\*RECOAT IN ONE HOUR**

**CLEAN UP WITH WATER**

**12 YEAR GUARANTEED**  
NOT TO CRACK PEEL OR BLISTER\*

"Guaranteed not to crack, peel or blister when applied according to the label directions for the appropriate surface. Colourtrend Paints (Aust) Pty Ltd will provide free of charge, sufficient paint to recoat areas affected by any failure to perform. The remedy is limited to free re-supply of the paint only. The guarantee does not cover failure due to the nature or any breakdown of previous coatings."

**NOTE:** Apply Perfect Prep on to a small section of the substrate and allow to dry for 48 hours. Complete soundness test to evaluate suitability of adhesion of this product to the substrate prior to application.

**APAS**  
AUSTRALIAN PAINT APPROVAL SCHEME  
This product complies with all the requirements of APAS specifications.  
0163/2 Undercoat  
0172 Primer

### Product Summary

**Use:** Interior / Exterior  
**Application:** Brush, roller or spray  
**Drying Time on a day of around 25°C**  
**Touch Dry:** 30 minutes  
**\*Recoat:** 1 Hour@50% relative humidity  
**Clean Up:** Water  
**Coverage:** Up to 16 sq metres per litre depending on porosity of substrate

### Directions

#### Prepainted Surfaces

- Ensure surface to be painted is sound. (see Soundness\*)
- Remove all traces of dirt, grease, oil, smoke deposits and any other contaminants.
- Remove all flaking, peeling material.
- Fill all imperfections with appropriate filler.
- Spot bare/repainted area with Australis PerfectPrep prior to applying full coat.
- Dust down and apply one coat of Australis PerfectPrep followed by finished coat/s.
- Sand all greying timber and apply one coat of Australis PerfectPrep followed by finish coat/s.

#### New Timber

- Interior/Exterior: Fill all imperfections with appropriate filler, sand, dust down and apply one coat of Australis PerfectPrep followed by finish coat/s.
- Sand all dressed timber.

#### Brick, Masonry, Cement Render and Fibre Cement

- Ensure surface to be painted is free from all contaminants, including mould, moss, lichen, efflorescence etc. Dust off and apply one coat of Australis PerfectPrep followed by finish coat/s.
- Cement Render must be allowed to cure for 28 days prior to application of Australis PerfectPrep and subsequent finish coat/s.

#### Galvanised Steel, Zincalume, Aluminium (Corrosion Free):

- Ensure surface to be painted is free from contaminants, including dirt, grease, oil etc. New Galvanised Steel and Zincalume may be left to weather prior to painting, if to be painted immediately, they should be thoroughly degreased using non metallic scourers and Mineral Turps. Surface should be thoroughly washed down with detergent solution followed by clean water.
- Apply one coat of Australis PerfectPrep followed by finished coat/s.

#### Vinyl and Aluminium Sidings

- Ensure surface to be painted is free from contaminants, including dirt, grease, oil etc. Chalking material should be thoroughly removed with non metallic scourers and detergent solution, followed by clean water. Care should be exercised so as not to score existing coating by harsh scouring.
- Apply one coat Australis PerfectPrep followed by finish coat/s.

#### Ceramic Tiles, Laminates, Gloss Enamel

- Ensure surface to be painted is free from contaminants, including dirt, grease, oil and soap scum. Apply one coat of Australis PerfectPrep followed by finish coat/s. PerfectPrep is not intended for use in areas subject to water flows and/or steam as in shower recesses etc.

### Soundness\*

- To determine the soundness of the surface to be painted, cut a small cross in the paint film with a sharp instrument, firmly apply cello tape and sharply remove. Any evidence of the paint film adhering to the tape is indicative of an unsound surface. This process should be carried out at several locations to test the entire surface.

### Application

- **Important** - Check weather forecasts and do not paint where forecasts indicate that rain is imminent, the temperature is likely to fall below 10°C or relative humidity will exceed 80%.
- Stir well prior to use and occasionally during use.
- During hot weather, painting should be commenced in an area away from direct sunlight. The addition of 50ml of water per litre will assist application in hot, dry conditions.
- Use sparingly on contact surfaces. The application of a second coat of Australis PerfectPrep will assist in evening out varying surface textures.

### Safety

Keep out of reach of children. Avoid contact with skin and eyes. Avoid inhalation of vapour by providing adequate ventilation.

### First Aid

**Eyes:** Rinse with running water for at least 15 minutes. If irritation continues seek medical advice.

**Swallowed:** Drink plenty of water and immediately seek medical assistance.

**Inhaled:** Exit area contaminated by vapours, seek medical assistance if effects continue.

### Disposal

- When cleaning up after painting, ensure that paint does not get into gutters or drains as it may contaminate waterways. For a free brochure on cleaning up after painting and the disposal of surplus paint, ring 1800-807-568 (free call). Do not reuse empty cans. This can is recyclable. Check with your local council to see if it is participating in a steel can recycling programme.
