

Dentures

	Full Set	Upper or Lower
Standard	\$450	\$300
Premium	\$650	\$400
Elite	\$850	\$500
Super Elite	\$1600	\$900

Standard - Most Economical

The dentist and lab technician select the size, shape and look of the teeth. A functioning denture with a medium tooth shade.

Premium - Cosmetic Approval

The Premium denture teeth are set in wax for the patient to have a Wax Try-In so that the patient can see how they look prior to fabrication. Only after you approve the denture's looks, will it be made. This denture comes in 3 tooth shades. Ethnic tinting of gums.

Elite - Most Popular

The Elite dentures use a higher quality tooth which gives you a longer wear and a more custom look. It includes a Wax Try-In for cosmetic approval and includes a broad choice of tooth shades including the B-1 (extremely white) shade as well as ethnic tinting of gums.

Super Elite - Our Best

The Super Elite denture is made with a three layer, high density acrylic tooth which provides the highest natural appearance and longest wear. Also the highest durability to stain resistance available, these teeth are very high quality and are quite expensive therefore they are not kept in stock but must be ordered (approximately 3 days). They also include a 2 year Breakage Protection Plan as well as a Personalizing at no charge if requested.

Dentures with Extractions

Many patients need and desire all their teeth extracted and dentures placed at the time of extraction. Depending on the number of teeth to be extracted the patient might have to wear a Treatment or Temporary Denture. The gums and bone will go thru drastic and dramatic changes after extraction for a period of time that varies with a patient's age and health, somewhere from four to twelve (4-12) months. The doctor will determine when the bone has healed enough for the permanent denture.

Treatment or Temporary Dentures - \$250 per Arch

Only in conjunction with extractions and the purchase of a permanent denture selection.

Relines

All Dentures should be checked for looseness every 3-5 years. Ill-fitting dentures are the leading cause of rapid ridge/bone reduction (What holds the denture in place)

Lab - \$195/side same day available
Chairside - \$175/side 1-2 hour procedure

Partial Dentures

Acrylic Partials (Flippers) - \$300/arch

Plastic partials replacing up to 3 teeth. Must be glued in.

Acrylic Partials w/clasps - \$450/arch

Replacing all missing teeth in the arch with wire clasps to help hold in place. Most affordable replacement of missing teeth.

Cast Metal Partials - \$900/arch

Stronger and less bulky and offers a better fit. Metal framework with metal clasps (not wire). Takes 2-3 weeks.

Flexible Partials - \$1100

A comfortable tissue supported partial that shows no clasps. Recommended for cosmetic purposes and periodontically involved teeth. (2-3 weeks)

Clear Clasp Partials - \$1300

A more esthetically pleasing alternative to cast metal partials. For people who desire a tight fitting partial and that have sound tooth and bone. (2-3 weeks)

All Permanent Dentures come with a one-year warranty that covers defects in materials and workmanship. All dentures and partials are made with ADA (American Dental Association) approved teeth. All dentures and partials are made with Fricke Hi-Impact acrylic base (gum) material which ensures the greatest protection against breakage.

Other Services

Exams

- Limited (problem focused) \$40
- Comprehensive \$60
