

Groundwater Monitoring

We implement technical leadership in our approach, promote experience in our services and support practical solution

About Us

Land & Groundwater Consulting Pty Ltd (LG Consult) is one of the forthcoming leading environmental consultancies operating in Australia.

Our clients include national, regional and local government, landowners and developers, waste and utilities companies, community organisations and individuals.

The vast majority of our work comprises repeat business from existing clients and new commissions from personal recommendations.

LG Consult's approach combines structured thinking and an awareness of the wider picture. It is based on working in partnership with clients in order to gain a clear understanding of their needs, provision of
