ClaimSynth

Cloud-based DME/HME Software

www.claimsynth.com

ClaimSynth is cloud-based software solution for medical equipment rental business. The application offers data management, business management and billing solutions at competitive prices.

Electronic Billing

Decrease your Days Sales Outstanding (DSO)! That's our motto developing Claimsynth. We provide electronic billing portal designed for Revenue Cycle Management. It provides:

- Submitting Electronic Claims
- EDI X12 835 (EOB) Posting
- Printing I500 Form
- Intuitive Dashboard
- Reports

We're constantly improving and developing new features via our customers' feedback!

Security

ClaimSynth provides cloud-based application which uses industry best practices to ensure the security of sensitive data. Patient information is encrypted with SSL (secure socket layers). We use HTTPS, secured certificates for the Internet. We also offer feature called locking by IP Addresses. Our technology methodologies are inline with HIPPA compliance.

Efficient and Cost effective

Claimsynth is designed to assist our clients to overcome daily office challenges.

- Improve office efficiency
- Seamless experience between billing and sales
- Reduce IT cost. Cloud based software automatically backups data and regular updates for improved features
- One-stop shop for managing Private Health Information (PHI) and supporting data
