The Sterlyn Group, Inc.

Is your information safe?

Committed to protecting your
business and your bottom line.

Information Security & Regulatory Compliance

Health care organizations have a myriad of information privacy and security concerns. On top of that, government regulations are becoming more stringent and carry high penalties. A breach in patient information, whether it be medical or financial, now carries significant financial fines and can be a public relations nightmare.

Securing your sensitive data can be a complex endeavor. Complying with regulations such as HIPAA and PL-125 can be daunting. Staff must be trained in business practices, information security, highly technical data analysis techniques and all applicable regulations just to understand the problem. And then, these skills must be kept current to ensure your organization is in compliance and protected in the event of an incident.

Who we are

The Sterlyn Group, Inc. is an information security services company. Our staff of security engineers are experts in a wide array of technologies and processes. We have extensive experience in a variety of industries such as finance, education, health care, manufacturing, banking and aerospace, just to name a few. Our clients range from small business to Fortune 100 companies. We have a sole focus on information security so our engineers provide best-in-class security services at an affordable price.

What we do

We specialize in analyzing data systems, business processes, corporate policies and procedures, regulatory requirements and corporate cultures to determine risks to your organization's bottom line. We do not sell any products and are therefore a completely independent, unbiased third party whose sole mission is to protect your information assets. We offer a range of services including:

- Enterprise Security Assessments

- Security Breach Response
- Employee Training Programs
- Risk Assessments
- HIPAA Privacy and Security Assessments
- Penetration Tests

How we do it

The Sterlyn Group utilizes a proven methodology developed over years of security and compliance work. Our three-phase deliver-

able allows for easy understanding by executive, operational and technical staff and is aligned with organizational goals along with realistic operational milestones. In other words, the technical jargon is distilled into language that is easy to understand.
