

FLEXIBLE BRANDED ENGAGEMENT SOLUTIONS

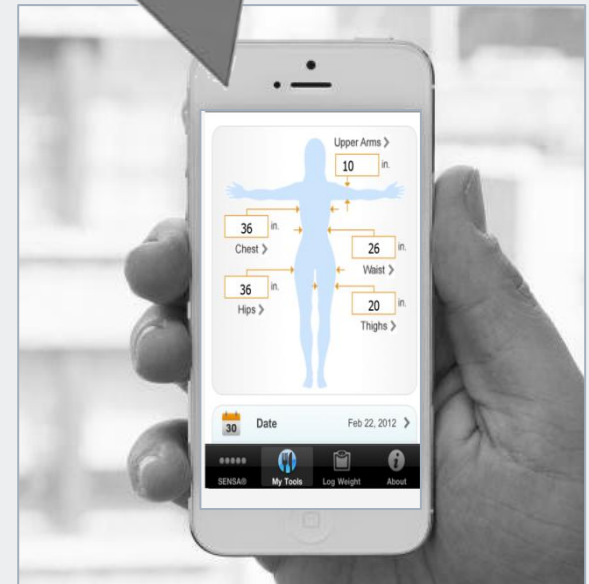

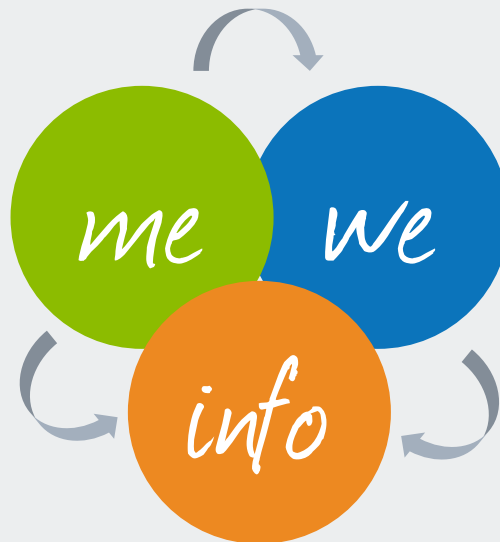

Wellness Layers has built several of the most engaging online and mobile health and wellness destinations in the world, some growing to multi-million member communities. For each client, we strategically customize our Platform and embed our proven three-layered approach to engagement:

Me Layer – Personal, guided plan

We Layer – Private social support network

Info Layer – Dynamic, personalized and actionable information

We combine these three layers in a meaningful way with our clients' products, programs and services to offer the highest value proposition for members and patients. Each layer includes triggers for engagement to prompt members to visit and interact with each other and the applications on a daily basis. Each activity is measureable and can be tracked to provide our clients with custom reports and analytics.
