

# About GuestRocket

GuestRocket is a mobile app for guests to collect loyalty rewards and coupons of their favorite restaurants as well as to order and pay for their meal - in advance or right at the place - to get a better and faster service than ever before.

# Task 8-10 images in total

- Photoshop an iPhone 5 (black & white) into the hand of a person who resides in an unnatural environment such as space, mount everest, deep sea, sky diving, submarine ...  
AND show people waiting in line with one person using the iPhone  
AND show a scene where most people are bored. One person is using the iPhone to „break out“
- iPhone screen should be visible to the viewer of the photoshopped picture
- Extra Bonus for a „Over the Shoulder View“
- Collages of multiple pics are good, as long as they look real.  
E.g. a climber from some pic put into a mount everest scenery.

## Requirements:

- Images should have a size of at least 1024\*768 px
- Images should be photorealistic, a second or third look is needed to see that it is 'shopped'
- Images should have a commercial license or else please provide URL to image for us to check it out (nasa pics are ok).
- If you found an awesome stock picture (e.g. istockphoto), don't hesitate to ask us and we look into it

over the shoulder view

# Basic Examples

# Waiting in Line Examples

best case would be a line inside a restaurant

# Places that bore people

like airports, trains, busses, taxis, business meetings
