GREBLON® turns a product into what it can be.

GREBLON® is non-stick technology. As such, GREBLON® offers a wide range of coating solutions for increased value, for decoration and for the conservation of value.

Since the foundation of WEILBURGER Coatings in 1900, our coatings have ranked among the most innovative solutions on the market. We bundle the technological know-how for coating solutions on the basis of fluoropolymers, polymer systems and sol-gel technology under the brand GREBLON®. These include heat-resistant non-stick coatings, functional coatings and decorative external coatings specially suited for both housewares and technological products.

GREBLON® coating systems are seen as a refinement because they perform the functions required of them.

Function and looks, performance and economic viability meet the requirement profile. GREBLON® turns frying pans and bakeware, waffle makers and hair straighteners, even scissors and rollers into what they are.

As the designer and manufacturer of the coatings we have been operating worldwide for decades. That's why we are available wherever our customers need us. Our teams are closely linked so that we can guarantee our quality standards all over the world. We work holistically for the ideal coating solution. We are available to our customers as a partner along the whole supply chain, from brand manufacturers to coatings companies and from importers to retailers. This is what we call "THE COMPLETE PACKAGE. WORLDWIDE."

The GREBLON® Team

WHEN THE COATING MAKES IT WHAT IT IS

They can only be convincing when they have a perfect all round finish. GREBLON® coatings enhance the appearance and functionality of products.

and technical
appliances.

WHEN KNOW-HOW CREATES NEW POSSIBILITIES

GREBLON® offers a full service for coating solutions that meet all the requirements of non-stick, durability and surface design.

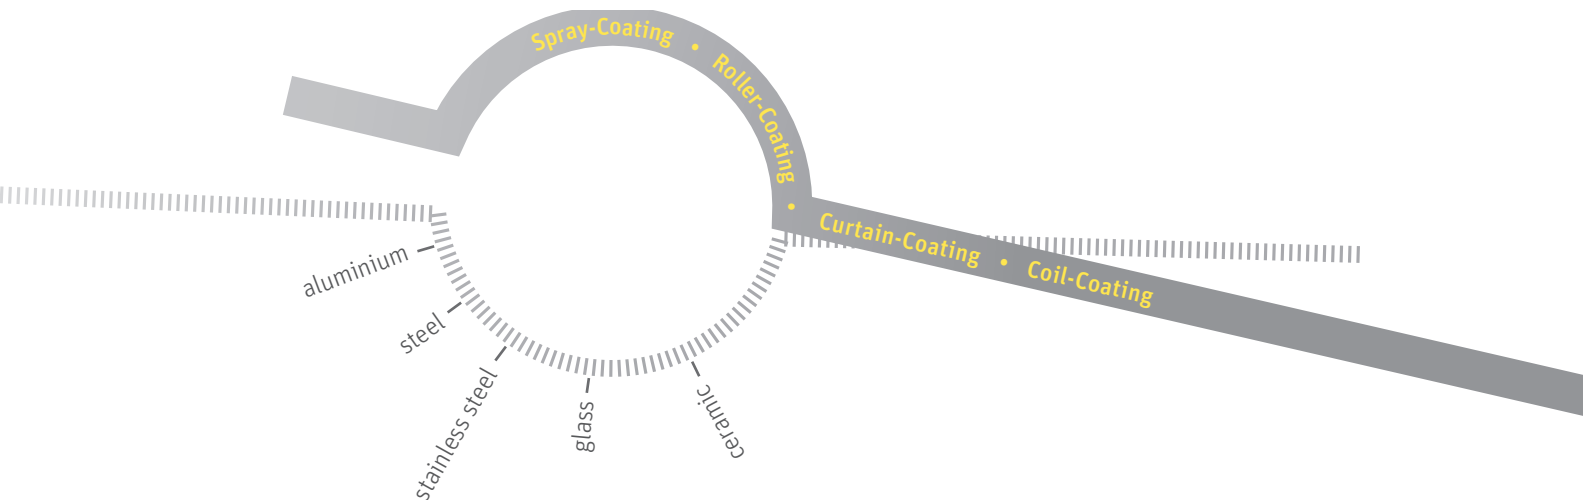

THE COMPLETE PACKAGE. WORLDWIDE.

WEILBURGER Coatings is on hand with help and advice for its customers when it comes to suitable and market-compliant coating solutions – both with a complete coating range and with technical know-how. As an expert in innovative coatings WEILBURGER has a complete range of PTFE and ceramic coating systems. Intensive research and many years experience are the starting point for the wide range of GREBLON® coating systems. That is why we have a product range that offers custom solutions for all kinds of consumer goods and for the technical field.

For the manufacturing process WEILBURGER, in addition to the coating solution, always provides the professional competence required for ideal project implementation: from a creative solution for trend products through support in the choice of substrate and the application process to technical service during the manufacturing process. In this way WEILBURGER Coatings brings its know-how from research and development as well as the knowledge of more than 35 years of market experience to the customer project. The result is coatings solutions that guarantee the quality required on the coated end product.

SUBSTRATE AND APPLICATION PROCESS

GREBLON® – the solution that is based on the perfect selection of the coating system and substrate on the one hand and the correct application process on the other hand. GREBLON® coatings support all established application processes across its full range of products.

GREBLON® QUALITY – MUCH MORE THAN JUST A WORD

GREBLON® has stood for the quality of the coating since its introduction to the market in 1974. This development over the decades is based on a constantly expanding system of quality management which guarantees permanent progress in the process quality. This process quality especially involves test procedures which allow an objective assessment of the product along the supply chain.

Starting with the development process we ensure that a new GREBLON® coating system does not go around the world before it meets all customer requirements. Even before they are made ready for the market, all products undergo physical and chemical tests and assessment procedures conducted by independent testing institutes. In this way, GREBLON® coatings systems evolve, through continuous development and market orientated research, setting standards for state of the art.

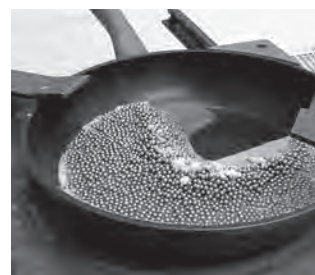

INDEPENDENT CONFIRMATION

Alongside extensive in-house testing, GREBLON® quality has been confirmed time and again by independent test institutions. In the course of such tests, special emphasis is placed on food conformity and the performance of the coating (German health authorities and the consumers' institutes and Stiftung Warentest). GREBLON® coatings have repeatedly provided convincing results.

WHEN A COATING FILM PROVIDES THE SOLUTION TO EVERYTHING

More than just “state-of-the-art technology”: GREBLON® systems are coating systems that set standards.

WHEN THE COATING TURNS INTO AN EXPERIENCE

GREBLON® CEBTD. Compelling non-stick coatings and perfect surface design in all markets.

GREBLON® C

for Cookware

The demands placed on the ideal coating solution are just as varied as the cookware itself and its use in the home. GREBLON® C non-stick coatings give frypans and saucepans exactly the kind of non-stick effect and durability that impress the customer.

ENJOY COOKING ON A DAILY BASIS

A guarantor on any cookware...

- from occasional to professional use
- for outstanding non-stick effect
- especially durable due to abrasion and scratch resistance
- based on fluoropolymers (PTFE) or ceramic coatings (sol-gel technology)
- innovative surface designs as a result of colour and effect coatings

GREBLON® E

for Electrical Appliances

Coatings from the GREBLON® E range have more to offer than their good looks. They guarantee a good result when it comes to baking, grilling, straightening or ironing. Waffle makers, table grills, sandwich makers, hair straighteners, irons, kettles and egg and rice cookers get precisely the functional coating needed for their application.

TARGETED FOR FUNCTION

Perfectly tailored for ...

- the requirements of the specific appliance
- excellent non-stick effect as well as outstanding friction characteristics
- easy cleaning
- high demands in surface design
- based on fluoropolymers (PTFE) or ceramic coatings (sol-gel technology)

GREBLON® B

for Bakeware

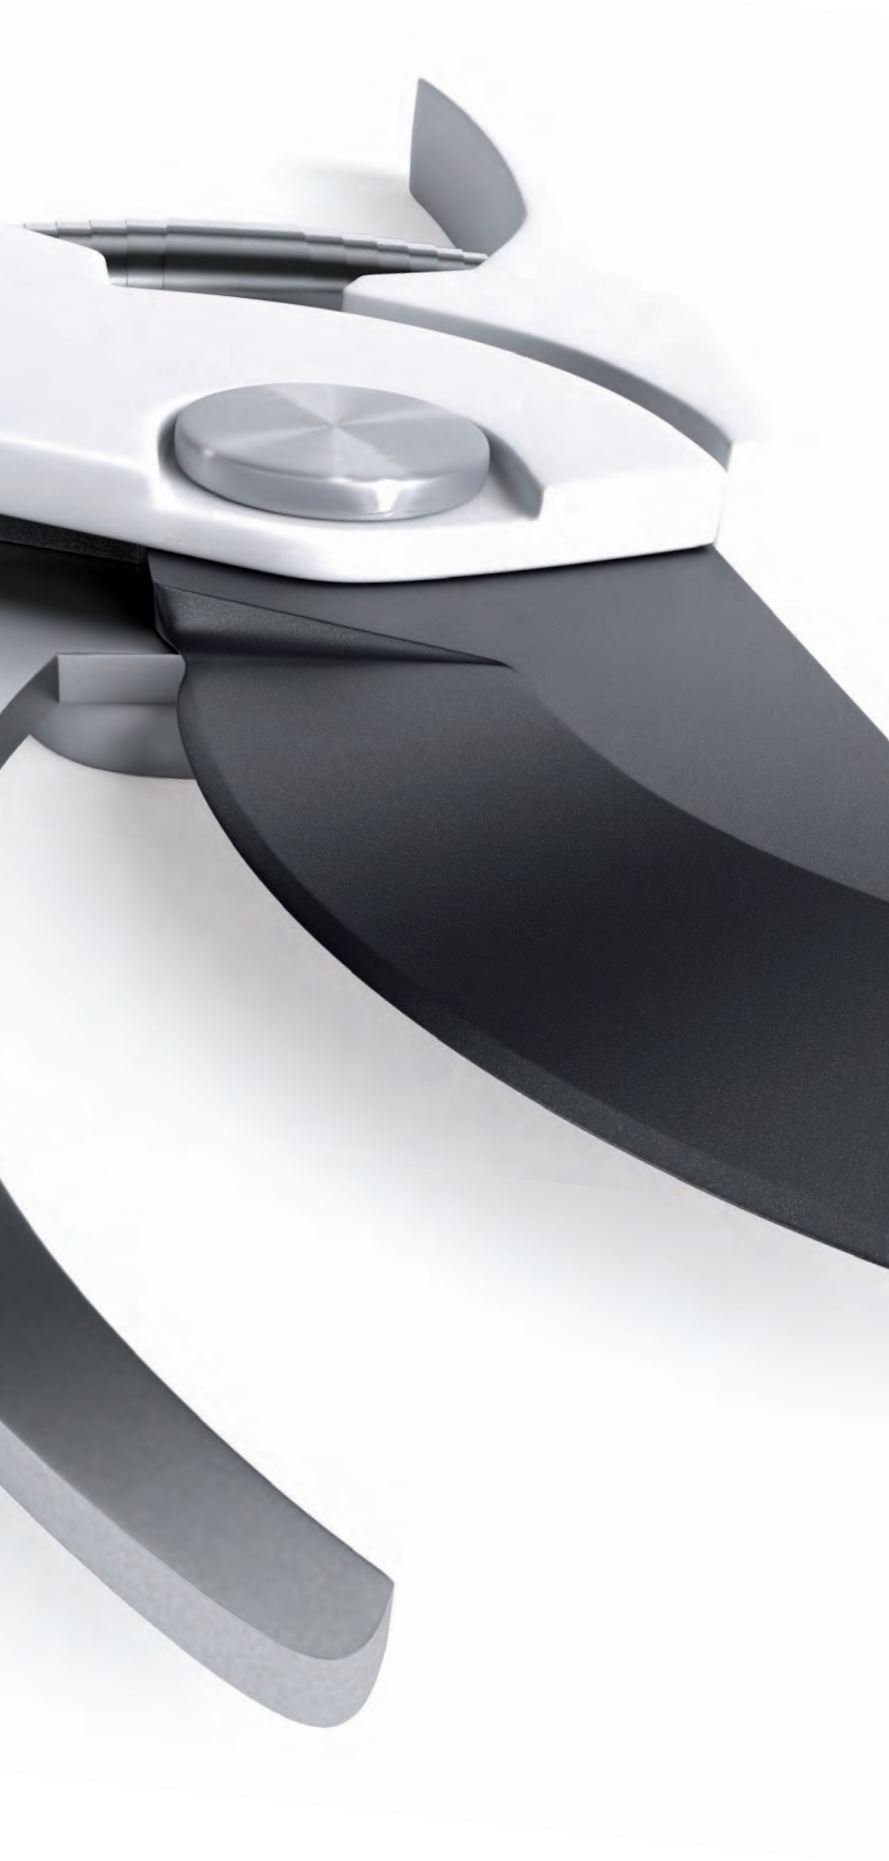

Bakeware coated with GREBLON® B does a great job. With their scratch resistance and outstanding surface the coatings provide the perfect treatment for cake tins, baking trays, ring moulds and muffin trays. GREBLON® B coatings make sure that the long-term performance characteristics stay the way they are to continue giving an ideal baking result.

FOR GREAT BAKING MOMENTS

For any tin or tray ...

- at home or in an industrial bakery
- with very good non-stick effect for ideal removal
- a reliable and extremely robust coating based on fluoropolymers (such as PTFE) or ceramic coatings (sol-gel technology)
- even for colourful trend products

GREBLON® T

for Technical Appliances

GREBLON® T provides customizable functional coatings for essential technical areas as well as for many additional industrial applications. GREBLON® T coatings have indispensable advantages when it comes to non-stick effect, “easy clean” characteristics, conductivity or heat, corrosion and abrasion resistance.

INDIS- PENSABLY VERSATILE EVERYWHERE

**Adaptable and optimized to suit
the application ...**

- made for specific use
- for all technical areas and industrial applications
- provides excellent performance characteristics for required functions
- based on fluoropolymers (such as PTFE), polymers or sol-gel technology

GREBLON® D has one of the widest and most versatile ranges for high-quality decorative external coatings on the market. All kinds of cookware and bakeware as well as all small electrical appliances can be coated in a way that meets the specific requirements of both the product and the surface design. Furthermore, GREBLON® D offers an almost unlimited range of colour variations.

APPEALING TO THE SENSES

Coating films that are visibly different ...

- for outstanding trend products when it comes to surface design
- for all kinds of housewares and appliances
- with brilliant colours and special effects
- with excellent “easy clean” characteristics
- based on fluoropolymers (such as PTFE), silicone polyester or ceramic coatings (sol-gel technology)

A black muffin tray is shown in the foreground, angled towards the bottom right. The tray has several circular compartments. Above the tray, there are dynamic splashes of green and yellow paint or liquid. The green splash is on the left, and the yellow splash is on the right, both appearing to be in motion. The background is a plain, light color.

WHEN QUALITY DEVELOPS LOGICALLY

A specialist in industrial coatings since 1900, a specialist in non-stick coatings since 1974 and since 2008 a specialist in ceramic coating solutions too: WEILBURGER Coatings provides innovative coating solutions worldwide.

THE HEAD OFFICE OF THE GREBE GROUP

has evolved into a major global manufacturer of industrial coatings since its foundation in 1900. WEILBURGER supplies a wide range of industrial coating systems that preserve and enhance value and provide decoration.

GREBLON® – BRAND FOR QUALITY

GREBLON® has been the brand name for WEILBURGER Coatings' non-stick and decorative external coatings as well as functional coatings for over 35 years. Today GREBLON® covers the complete product range of high-quality coating systems based on fluoropolymers, other polymer systems and sol-gel technology. Where function and durability are concerned, GREBLON® offers the characteristics of quality that leading producers rely on both for housewares and for technical applications.

Our outstanding flexibility guarantees a quality that is called for and indeed necessary. That is why thanks to our intensive research and development, the GREBLON® product range is counted as one of the widest and most innovative in the market for non-stick coating systems, decorative exterior coatings and technical functional coatings.

The GREBLON® brand communication is as distinctive as it is clear. The brand, the labels, the product identification and the origin of good quality are becoming clearly visible everywhere. Within the markets, the wide product range is structured into the various applications. The GREBLON® product lines concentrate precisely on coating solutions that best serve the specific requirements of the individual markets. That then is GREBLON® CEBTD – the really comprehensive range of specialized coating solutions.

WHEN GLOBALITY CREATES PROXIMITY

Around the world our teams are closely linked and work according to common quality standards. They are always exactly where they are needed. That way WEILBURGER Coatings applies German quality to the coated product.

10 REASONS FOR CHOOSING WEILBURGER COATINGS

WEILBURGER worldwide

Europe:
5 Production sites
2x Germany
Italy
France
Poland

Asia:
5 Production sites
Japan
Indonesia
2x China
India

South America:
1 Production site
Brazil

WEILBURGER Coatings is wherever our customers need our support. This is what our global presence guarantees. All over the world you can be certain that high-quality GREBLON® coatings will produce high-quality coating results.
