

# OUR PROMISE

## FRESHNESS

Our fishermen deliver freshly caught fish, on a daily basis, that are kept in temperature controlled cabinets which are then transferred to our EU Certified packing factories. Our fish are processed on the same day and delivered overnight to our customers all across the globe, meaning they get "A" grade fresh yellowfin tuna less than 24 hours from their processed time. It doesn't get any fresher than this.

## QUALITY

Our fish is processed and packed in an ISO and EU certified factory where stringent quality control practices are maintained. The factory is regularly audited for health, safety and quality features.

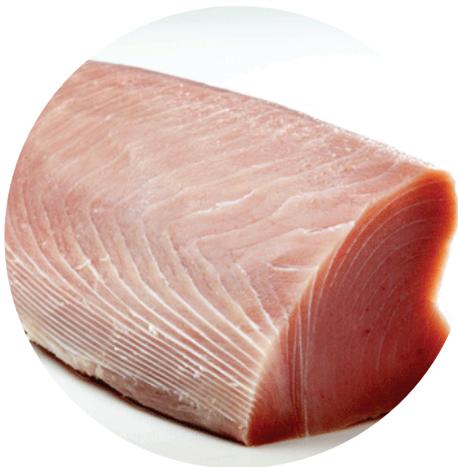

## FLEXIBLE MOQ

One of the greatest advantages of working with us is that we have absolutely no MOQ requirements for our customers. We serve according to our customer needs enabling them to have fresh stock throughout the year in volumes that they can afford to manage.

## DOOR-STEP DELIVERY

We believe that, no matter where we are located, our customers deserve the best products and the best service, which is why we promise door step delivery to all our customers who require them. We partner with the best local courier agents to ensure our customer orders are delivered on a timely manner to their door steps, because we value your business and we believe every second counts.
