

Our Company

Consolidated Rentals (CCS Rentals PTY LTD) has two depots in Western Australia; one in the North West and one in Perth. We are young enthusiastic company and strive for a competitive edge to rival other large companies. Our focus is to cover all areas in the hire industry including: plant and equipment hire, people resourcing, axillary equipment hire, vehicle fleet management and scaffolding hire. Other service areas can be negotiated with management if needed.

Experience

Our North West office in Port Hedland has serviced moderate sized contracts with local companies for the past two years. Currently, we have an ongoing stream of local work and are the preferred contract supplier for the Shire of Meekatharra and various mining contractors with in Port Hedland and civil contractors within Perth. We are experienced in servicing remote areas and use local resources were possible.

The Difference

Our vehicle Fleet management is based on usage and tracked through GPS. The GPS tracks machine standby and also acts as a safety device for remote operations of vehicles and machines. With the standby rate being monitored we provide a hassle free cost reduction for large projects with reports sent through with all invoices. If you require a operator simply add the operator as per the people resourcing section with the machine day/hourly rate, rates for the machines stay the same and the inclusions are remain the same unless negotiated.

Transport and General Information

Transport Clients can arrange their own pick up Ex Perth or Port Hedland. For an additional demobilisation/ mobilisation fee which is cost plus 10% we can organise transport. We will investigate a cost efficient way of transporting all equipment.

GST Prices are exclusive of GST

Short term refers to hire for less than 1 month

Not included Fuel, daily servicing for example; where prestart fluids may require topping up.
30 day trading terms.

The hirer is responsible for unless agreed upon prior to engagement:

- all operating costs including fuel, oil and wear parts
- all minor repairs (hydraulic hoses, fan belts etc)

Earth Moving Equipment

Excavators (dry hire)

We have a range of excavator's from small to large and can supply attachments as required for project needs. When selecting machine's we look at the predominant areas of work to ensure effective serviceability is readily available for any unforeseen breakdowns. Our current fleet is mainly CAT and Hitachi because of the serviceability in remote areas. Recently, CCS purchased a Kubota for work within the Perth Metro area.
