

## ABOUT US

- We are a specialist local consulting company based in Sydney. We advise Australian smash repairers about how to improve revenue and profitability.
- We advise repairers on how they are able to use independent assessors to get paid more for completing repair work.
- We advise repairers on how they are able to utilise loan vehicles to get paid more on every repair job.
- We are paid for our services on a case by case, "No Win, No Fee" basis. We are only paid if our customers make money.

## OUR MISSION

- Our mission is to prevent insurance companies from abusing the smash repair industry.
- Our goals are to help individual smash repairers fix more cars, and to get paid more for repairs.
- We only act in the best interests of repairers.
- We advise repairers about how insurance companies have used absurd self-assessing procedures, unrealistic repair time databases and unfair scare tactics in their effort to destroy the independent smash repair industry.

## HOW TO SUCCEED IN PANEL BEATING:

The key to succeeding in the smash repair industry is to accept that insurance companies are hostile to independent smash repairers. Insurers act in their own interests, and their interests are the opposite of the interests of the independent smash repair industry.

Increase profits by engaging an independent assessor to review your quotation, and use a collections company to recover the costs of repairs from the insurance company of the person who caused the accident.

Significantly increase revenue by providing loan vehicles to your customers. The cost of the loan vehicle is recovered from the insurance company of the person who caused the accident. We can show you how!

## HOW TO BENEFIT:

- Ask your customer how the accident happened.
- If your customer is not at fault, call [\(02\) 8015 5495](tel:(02)80155495).
- Download our claim form at [carsclaim.com.au/claim-form-3](http://carsclaim.com.au/claim-form-3)
- Ask your customer to complete the form and email/fax the form back to us.
- We will recover the cost of repairs from the "at fault" insurance company, which bypasses any "cash settlement" schemes used by insurers to drive repairers out of business.
- There is no need to actually fix the vehicle before the recovery is complete.

## THE BENEFITS:

1. Get paid what you deserve rather than what an insurance company is willing to offer.
2. Repair customer vehicles straight away without waiting for approval.
3. No more dealing with insurance company assessors.
4. Service uninsured people, or anyone else who does not want to go through their own insurer.
5. Get paid for providing courtesy cars to customers.

## BEST OF ALL:

1. No upfront costs.
2. No recovery, no fees.
3. No need to repair vehicle.
4. No hassles with insurance company assessors.
5. No problems with cash settlement.
6. Maintain existing relationships with insurers.
